

# BANGING BALLS - VS - DRILLS

"You don't win one of these from banging balls around."

- Nick Varner

## WHAT MAKES YOU BETTER

How do you know your Game is improving? What if I can show you a way to measurably see your progress toward increasing your handicap? I can and it's through the time tested method of training drills. I have the rudiments to push you past the plateaus that seem to hold you back.

## PRACTICE IS BORING

Admit it! You don't really practice do you? You play a lot of pool. You even compete sometimes—but practice? That's BORING!!!

Why is that? Because the majority of players don't know how to practice, or at least practice effectively. I'm going to help you make practicing more productive.

## ALWAYS WARM UP FIRST

Most of the time, you walk up to the table, empty a few pockets, and start drilling balls into the holes. This is not warming up; that's just banging balls around the table.

However, on league night or before the start of a tournament, you need to get warmed up—the right way. Completing one Pro Skill Drill will warm you up more than 30 minutes of banging balls can.

## FOCUS AND FINE TUNE SHOT MAKING

Nothing increases your playing skills like practice drills. They develop your utmost in focused concentration, isolation in shot making, and establish your pacing for technique and execution. Your overall player skill level will be improved through practicing these professional drills.

*Pro Skill Drills* will develop your focus, fine tune your shot making skills, and build your playing consistency. I wish I would have had these practice drills when I was learning how to shoot pool years ago.

## DRILLS ARE TIME-PROVEN

I'm proud to say I have won the World Champion title eight times, and the only player in history to have won it in all five disciplines of pool. Also, I'm honored to be in the Billiard Congress of America's Hall of Fame. These are the tools I've used to win.

Now, you can use these fully illustrated Books and DVDs to establish your pace of play and mechanical consistency. Your speed control for making cue ball position, will be perfected within hours—not years.

During play, shot patterns will become clear within seconds. Outside distractions will not divide your attention. You will win more games of pool in direct proportion to your ability to execute each of these *Pro Skill Drills* successfully.

Finally, I believe that the first step to making it to the winner's circle today is to have the skill building knowledge that Pro Skill Drills offers.
